

Does your pool pass the test?

Swimming pools should be fun. Prior to the introduction of the pool safety laws, drowning was one of the leading causes of death in Queensland for children aged under five.

Supervising young children and teaching them to swim at a young age can save lives. Effective pool fencing also helps keep young children safe.

Queensland has some of the highest pool safety standards in Australia. All pools must comply with the pool safety standard by 30 November 2015, or earlier if the property is sold or leased.

To find out if your pool meets the current pool safety standard complete this checklist.

Checklist

- My pool is registered. Failing to register your pool can result in an on-the-spot fine of \$227.70 or a maximum penalty of up to \$2,277 if a complaint is made to your local government or the Pool Safety Council. To register your pool, call the Pool Safety Council on **1800 340 634** or visit www.hpw.qld.gov.au.

Pool fences

- I have a pool fence restricting access from my house to my pool.
- The outside of my pool fence is at least 1.2 metres high all the way around.
- The bottom of my pool fence is less than 100 millimetres off the ground all the way around.
- All vertical or near-vertical fence uprights are no more than 100 millimetres apart.
- All horizontal or near horizontal fence rails are at least 900 millimetres apart.
- My pool fence is well maintained—there are no holes or broken posts or rails.
- There are no climbable objects near the fence that would allow a child to climb into the pool area such as BBQs, trees, rocks, shrubs and furniture.
- A cardiopulmonary resuscitation (CPR) sign is prominently displayed in the pool area.

Pool gate

- My pool gate closes by itself from any open position.
- My pool gate latches by itself when it closes.
- My pool gate opens outwards, away from the pool.
- I never prop open or tie back my pool gate or otherwise obstruct it from automatically closing.
- I have a latch release which is at least 1.5 metres above the ground or shielded so a child cannot open the gate.

Building a new pool

- I have a building approval for the swimming pool and fencing.
- I have a sign warning people that I have a pool under construction and it is clearly visible from the road at the front of my property.
- I have obtained certification for the fence (temporary or permanent) around my new pool prior to filling it with water.
- I have obtained a final inspection of the swimming pool and permanent fence.

Windows

Check any windows that could allow a child to go from your house directly to the pool area.

- My windows do not open wider than 100 millimetres or my windows are suitably screened to prevent access to the pool area.

Doors

- There is no direct access through a door from the house to the pool area.

These features are some key requirements under Queensland's current pool safety standard. On-the-spot fines of up to \$796.95 and further penalties up to \$18,785.25 can be imposed on pool owners if their pool fence does not comply with the law.

If you have an indoor pool or require further information on an outdoor pool, please contact the Pool Safety Council or a qualified inspector.
