

FLOOD CLEANING CHECKLIST

EFFECTIVE SEPTEMBER 2018

TASK		Timber Cavity Walls	Concrete Floors	Metal Surfaces	Brick or Concrete Block	Gyrock or Plaster Board	Chipboard or Particle Board	Fibre Cement or Sheeting	Ceramic Tiles	Timber Floors	Fixtures and Fittings	Split System Air-Conditioners
General clean	Remove any surface water											
	Sweep or vacuum surfaces clear of any loose material											
	Thoroughly scrub or mop all surfaces using detergent											
	Remove sheet materials that have been immersed in water. Dispose of in skip and cover with thick plastic											
Disinfect	Spray on disinfectant and scrub as dictated by product instructions											
	Spray on fungicide and scrub as directed by product packaging											
	Wipe clean with microfibre cloth (or similar) and clean with water											
	Spray vinegar solution to provide ongoing protection											
Dry	Ensure the area is thoroughly dry (use dryers if necessary)											
	If applicable to the surface, check the moisture content											
SPECIAL INSTRUCTIONS		Remove any mould affected glue										
							WARNING: use an appropriately licensed professional to remove asbestos – do not attempt to do this yourself	The underside of lifted tiles should also be disinfected		Sand back areas affected by engrained mould		
												Cooling coils may need to be cleaned with purpose-made solution
