BCA 2006 Information Seminars

BCA 2006 Information Seminars will address changes to the BCA for 2006, including important new energy provisions. The ABCB, in conjunction with Australian Institute of Building Surveyors (AIBS) seek to raise awareness about these changes and inform as many building practitioners about them as possible.

The one-day seminars will be divided into morning sessions and afternoon workshops. The morning sessions will be hosted by the ABCB and will provide an overview of the changes to the BCA, including those for energy efficiency. The afternoon workshops will be hosted by AIBS and will interest mainly building surveyors and certifiers. The workshop will provide training on the practical application of the new energy efficiency provisions including building fabric, glazing, maintenance, lighting, compliance, assessment and an overview of State and Territory administrative processes.

This is an important learning opportunity which will enable building practitioners to learn from the BCA's technical experts in person.
