BSA ENGINEERS FORUM 2007

WHEN: Thursday, 14 June 2007 (8.30am to 3.00pm)

WHERE: The Irish Club, 1st Floor 171 Elizabeth Street, Brisbane

PROGRAM:

- Update/Impact of Subsidence Policy – *“Rectification of Building Work in Review”*
- SA ongoing commitment to education Building Practitioners, Designers and Home Owners
- Changes to Standards Australia AS2870 Update
- Residential Subdivisional Development Practices: *“Impact on Industry, Engineers, Builders & Consumers & the BSA”*
- Board of Professional Engineers Update on the Code of Conduct & Review and Investigations Residential Construction
- Case study research on the effects of trees on residential footing and slab systems
- Effects of trees –Guidance for Site Classification & Design

WHO SHOULD ATTEND:

Geotechnical & Structural Engineers, Soil Testers and others involved in the site investigation for site classification, footing and slab design or certification of footing and slab systems.

BACKGROUND:

Last year’s forum focused on the impact of the Queensland Building Services Board Policy for *Rectification of Building Work* in residential construction including case studies on footing/slab movement, overviews on industry practices and liability for engineers.

BSA is committed to *Improving Standards, Equity and Confidence in the Building Industry* and believes that these Forums will foster partnerships with industry stakeholders. BSA recognises the importance of your role in the building process and looks forward to your participation in this Forum.

It will be an opportunity to catch up with engineering practitioners and also providing your feedback.

HOW TO REGISTER:

Please register your attendance by filling out and faxing the [engineers forum faxback](#) or phone Marie-France on 3247 5759 by Friday 8 June.
