Building Services Authority - Tender Panels

19 August 2005

BSA has established tender panels of licensed contractors used for the purposes of rectifying and completing building work for consumers who claim under the statutory insurance scheme. In the last financial year BSA approved approximately \$21 million in insurance claims through these panels.

Expressions of interest are sought from building contractors who wish to be on these panels, and are interested in quoting for:

Rectification of residential construction work – repairs over \$10,000.00

and

Completion of residential construction work and the rectification of associated defects

In the greater Brisbane, Townsville, Gold Coast and Sunshine Coast areas.

Expressions of interest are also being called for general building work tender panels in other regional centres throughout Queensland.

To be considered for inclusion on these panels your expression of interest must be returned to BSA no later than **19 SEPTEMBER 2005**.
