

## COMPARISON OF NOTIFIABLE WORK

From 1 July 2019, the categories of Notifiable Works have been changed.

These changes reduce the number of categories, to provide clarity and usability. Work that before 1 July was Notifiable Work will stay that way, and you will still need to fill out a Form 4 or Form 4A, but the category you report it under may be slightly different:

NEW CATEGORY (FROM 1 JULY 2019)		OLD CATEGORY (TO 30 JUNE 2019)	
	Emergency work is no longer a separate category of Notifiable Work. This work should be reported under the new category for the type of work done.	1	Emergency work
1	Work necessary for extending, altering, replacing or removing supply pipes, other than supply pipes for a fire service, if the work is for an existing building; an extension to an existing class 1 building; or a structure for an existing class 1 building.	2	Work necessary for extending, altering, replacing or removing existing water supply piping, other than extending or removing a fire service.
2	Work necessary for extending or removing a fire service, if the work is associated with a building development approval under the Building Act 1975, schedule 2; and for an existing class 2 to 9 building.	3	Work necessary for extending or removing a fire service if the work is associated with a building development approval as defined under the Building Act 1975, schedule 2.
3	Work necessary for extending, altering, replacing or removing sanitary plumbing, if the work is for an existing building.	4	Work necessary for extending, altering, replacing or removing existing sanitary drainage, other than a combined sanitary drain, for a building classified under the Building Code of Australia (BCA) as a class 1 or 10 building.
4	Work necessary for extending, altering, replacing or removing sanitary drainage, other than a combined sanitary drain, if the work is for an existing class 1 or 10 building or structure; an extension to an existing class 1 building; or a structure for an existing class 1 building.	5	Work necessary for extending, altering, replacing or removing existing sanitary plumbing for a building classified under BCA as a class 2 to 9 building.
5	Work necessary for installing, replacing or removing a temperature control device, if the work is for an existing building; an extension to an existing class 1 building; or a structure for an existing class 1 building.	6	Work necessary for installing, replacing or removing a temperature control device.
6	Work necessary for installing, replacing or removing a water heater, if the work is for an existing building; an extension to an existing class 1 building; or a structure for an existing class 1 building.	7	Work necessary for installing, replacing or removing a water heater.

NEW CATEGORY (FROM 1 JULY 2019)		OLD CATEGORY (TO 30 JUNE 2019)	
7	Work necessary for installing, replacing or removing a testable backflow prevention device or a dual check valve with atmospheric port, if the work is for an existing building; an extension to an existing class 1 building; or a structure for an existing class 1 building.	8	Work necessary for installing, replacing or removing a testable backflow prevention device.
		9	Work necessary for installing, replacing or removing a dual check valve with an atmospheric port.
8	Work necessary for installing a greywater use facility that includes a greywater treatment plant in a sewered area, if the premises where the facility is proposed to be installed generates no more than 3kL of greywater a day; or replacing a greywater treatment plant.	10	Work necessary for replacing a greywater treatment plant for a building classified under BCA as a class 1 building.
9	Work necessary for installing or relocating a fixture, if the work is for an existing class 1 or 10 building or structure; an extension to an existing class 1 building; or a structure for an existing class 1 building.	11	Work necessary for installing a fixture in a building classified under BCA as a class 1 building.
		12	Work necessary for relocating a fixture in a building classified under BCA as a class 1 building.
		14	Work necessary for installing or relocating a fixture in a building, classified under BCA as a class 10 building.
10	Work, other than for sanitary drainage, necessary for installing or relocating a fixture, if the work is for an existing class 2 to 9 building of 1 or 2 storeys above ground.	13	Work, other than work for sanitary drainage, necessary for installing or relocating a fixture in a building, classified under BCA as a class 2 to 9 building, of 1 or 2 storeys.
11	Work necessary for sealing a sanitary drain upstream from the connection point for a treatment plant or a service provider's sewerage system, if the work is for an existing building.	15	Work necessary for sealing a sanitary drain upstream from the connection point for a service provider's sewerage system.
12	Work necessary for sealing a supply pipe downstream from a water meter, if the work is for an existing class 2 to 9 building.	16	Work necessary for sealing an existing water service downstream from a water meter for a building classified under BCA as a class 2 to 9 building.
